13kgs

## ABOUT US

Since 1981, Stramatel has been designing, developing, manufacturing and servicing electronic displays, swimming timing systems and video solutions.

About 50,000 electronic displays have come out of our production plant located in the western of France.

**Lift up your eyes, we are there.** Each day, in more than 80 countries across the World, hundreds of thousands of people watching sporting events have their eyes riveted on our equipment.

**The high technology behind the emotion.**

What would a competition be without a reliable display of the score?

This is why, for more than 35 years, all Stramatel products are made of the most up to date equipment : latest generation LEDs, ultra-sensitive sensors, radio-controlled consoles...

Our expertise is at your disposal.

Our export sales team is dedicated to support each customer project. In each country, we select the most competent partners to supply, install and service our products.

**Today Stramatel is recognized as the European leader in sports display.**

### Quality and environment respect

ISO 9001  
QUALITY

ISO 14001  
ENVIRONMENT

REACH ✓

All Stramatel equipment presented here is guaranteed (2 years outdoor and 3 years indoor) Parts and Labour in Workshop, except the computer and the printer which have a one-year manufacturer's warranty.

### Technical support

Depending on location and project, installation of the swimming timing systems can be made by Stramatel technicians or the Stramatel distributor.

Our position of European leader in terms of electronic scoreboards requires us to have reliable technical service with competent professionals.

Our after-sales service is composed of technicians able to support and install our equipment in more than 80 countries.

Phone support by French, English, German, Spanish and Polish speaking technicians for Stramatel After-sales service is immediate during opening hours.
